

MICROCIRCULATION LINKUP MINI ELECTRIC BUS

Large passenger capacity

Short front and rear overhang allows larger flooring space inside the vehicle with passenger capacity up to 30.

Super safety

The vehicle is under the protection of Yutong "YESS" safety standard, while a proprietary nitrogen protection system is also put in place for battery safety.

Strong adaptability

The longest wheelbase among buses with the same length and turning diameter < 17m, making the vehicle easily adapt to various road conditions.

AN AGILE VEHICLE FOR JOYOUS RIDING

Appearance design

The vehicle's styling design draws inspiration from the Red Dot Award winner Xiaoyu 2.0. Inheriting the design gene of Xiaoyu 2.0, its space capsule appearance is full of science and technology sense.

"U-shaped" flying-wing decoration and smiling front face create a lovely and approachable bus which will become a new symbol of the city.

Safety performance

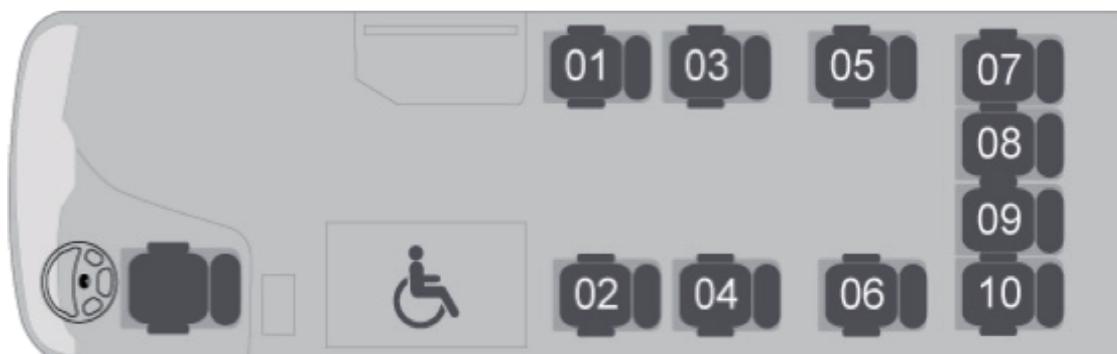

Top-mounted battery, which is far away from the passenger area. In addition, an anti-collision device at the tail of the vehicle also comes as standard to effectively protect the rear batteries for the safety of passengers.

Operation capability

Thanks to a full time monitoring system, the traction battery is placed under real-time monitoring. Any abnormalities can be reported in real time for timely maintenance to ensure worry-free operation.

Seat layout
10+1 seats

Technical specifications	
L*W*H(mm)	6960*2280*2970
Interior height(mm)	2130
Wheelbase(mm)	5240
Minimum turning diameter(m)	17
Approach /departure angle	21°/24°
Floor type	Low floor
Wheelchair area	1

Maximum number of seats	10
Maximum passenger capacity	30
Battery capacity (kWh)	140.95, liquid cooling
Charging system	CCS2, DC single charging socket
Rated power of motor (kW)	165/120, rear axle integrated motor
Tyre	235/75R17.5
Axle	Front and rear disc brakes
